Smart People Developing for Smartphones

Smartphones are the fastest growing segment of the mobile phone market. Companies are just now beginning to appreciate the benefits of having a mobile presence. That is where we come in. We offer you the expertise and dedication you need to ensure the success of your project.

Android is growing fast as a platform and so is the demand for Android application development. SAI IT Solution has been one of the early starters in the realm of Android development and has one of best Android development teams.

Our Android developers have years of experience in the mobile application development space and are well conversant with Android Software Development Kit (SDK), OpenGL, 3D graphics, Android Media APIs, Location–based Service APIs, Wi–Fi APIs, Android Security Architecture and other technologies required to build best in class Android apps.

Our experience of the Android Market Place coupled with our talented designers and extremely knowledgeable Android developer team gives us the confidence to take on the toughest of challenges and deliver outstanding Android apps that you would love.
